

# Holistic dairy asset management solutions for aggregated dairy businesses

From the paddock to  
the board room table

agCap

We are the nexus  
between farmer  
and investor.

agCap dairy asset management aims to ensure that the People, Process, Livestock and Pastures are structured and aligned to ensure the best prospect of assets performing above average.

agCap adds value by helping owners regain control of their business including:

- Improved key staff retention
- Livestock traceability
- Traceability of all inputs and outputs
- Improved visibility and output of reporting systems

Today's Australian dairy farm businesses are dealing with:

- Volatility in seasonal conditions, input costs and farm gate milk price
- More complexity with increased demands for accountability, reporting and compliance.
- Anecdotal evidence suggests that the greatest challenges facing dairy farm businesses today (aside from farm gate milk price), include;
  - On-farm labour;
  - Livestock performance; and
  - Evidence based reporting to support our social license to operate

agCap is equipped to help you deal with these challenges

## About agCap

agCap is an asset management business specialising in Australian dairy farm investments, operations and farm management.

### agCap's mission is to:

- Provide professional asset management for investors and owners in Australia's dairy sector
- Achieve optimal returns for investors and owners
- Manage assets for longer term sustainability
- Provide rewarding career opportunities and a safe working environment for our staff & contractors
- Increase the market for professional investment in agriculture

“The best farmers (and their advisors) avoid the common mistake of decision makers of seeing the problem/ decision only in part. They use the whole farm approach and accept that a farm is a combination of all things”
